

Journal of Fluid Mechanics

VOLUME 831

- 1 On the flow and coherent structures generated by a circular array of rigid emerged cylinders placed in an open channel with flat and deformed bed
W.-Y. Chang, G. Constantinescu & W. F. Tsai
- 41 Direct numerical simulation of turbulence over anisotropic porous media
Y. Kuwata & K. Suga
- 72 Exploring the dynamics of '2P' wakes with reflective symmetry using point vortices
S. Basu & M. A. Stremler
- 101 Added mass: a complex facet of tidal conversion at finite depth
C. Brouzet, E. V. Ermanyuk, M. Moulin, G. Pillet & T. Dauxois
- 128 Complete Hamiltonian formalism for inertial waves in rotating fluids
A. A. Gelash, V. S. L'vov & V. E. Zakharov
- 151 A neural network approach for the blind deconvolution of turbulent flows
R. Maulik & O. San
- S 182 Prograde, retrograde, and oscillatory modes in rotating Rayleigh–Bénard convection
S. Horn & P. J. Schmid
- 212 Non-local continuum modelling of steady, dense granular heap flows
D. Liu & D. L. Henann
- 228 Boundary element methods for particles and microswimmers in a linear viscoelastic fluid
K. Ishimoto & E. A. Gaffney
- 252 The instability of a moving interface in a narrow tapering channel of finite length
J. C. Grenfell-Shaw & A. W. Woods
- 271 Supersonic flow fields resulting from axisymmetric internal surface curvature
A. A. Filippi & B. W. Skews
- S 289 Consistent equations for open-channel flows in the smooth turbulent regime with shearing effects
G. L. Richard, A. Rambaud & J. P. Vila
- 330 Velocity profiles, flow structures and scalings in a wide-gap turbulent Taylor–Couette flow
A. Froitzheim, S. Merbold & C. Egbers
- S 358 Spectral energy cascade in thermoacoustic shock waves
P. Gupta, G. Lodato & C. Scalo
- 394 On the propagation of gravity currents over and through a submerged array of circular cylinders
J. Zhou, C. Cenedese, T. Williams, M. Ball, S. K. Venayagamoorthy & R. I. Nokes
- 418 Transition to turbulence in pulsating pipe flow
D. Xu, S. Warnecke, B. Song, X. Ma & B. Hof
- 433 On the macroscopic modelling of dilute emulsions under flow
P. M. Mwasame, N. J. Wagner & A. N. Beris
- 474 Gas depletion through single gas bubble diffusive growth and its effect on subsequent bubbles
Á. Moreno Soto, A. Prosperetti, D. Lohse & D. van der Meer
- 491 Turbulent horizontal convection under spatially periodic forcing: a regime governed by interior inertia
M. G. Rosevear, B. Gayen & R. W. Griffiths
- 524 Instability wave–streak interactions in a supersonic boundary layer
P. Paredes, M. M. Choudhari & F. Li

SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published *semimonthly* in 24 volumes each year by Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS, UK/Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. The subscription price (excluding VAT but including postage) for volumes 810–833, 2017, is £4204 or \$7760 (online and print) and £3774 or \$6611 (online only) for institutions; £1166 or \$2161 (online and print) and £1174 or \$1928 (online only) for individuals. The print-only price available to institutional subscribers is £4055 (US \$7137 in USA, Canada and Mexico). Single volumes cost £194 (US \$342 in the USA, Canada and Mexico) plus postage. Orders, which must be accompanied by payment, should be sent to any bookseller or subscription agent, or direct to the publisher: Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air. Copies of the *Journal* for subscribers in the USA, Canada and Mexico are sent by air to New York. Periodicals postage is paid at New York, NY, and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to *Journal of Fluid Mechanics*, Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Claims for missing issues can only be considered if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

COPYING

The *Journal* is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA which are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/2017/\$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information on *Journal of Fluid Mechanics* is available on cambridge.org/FLM. For further information on other Press titles access cambridge.org/.

Readers should note that where reference is made to a Web site for additional material relating to an article published in *Journal of Fluid Mechanics* this material has not been refereed and the Editors and Cambridge University Press have no responsibility for its content.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the World's forests. Please see www.fsc.org for information.

Printed in the UK by Bell & Bain Ltd.

The picture on the cover is based on figure 1(d) of 'Sedimentation of inertia-less prolate spheroids in homogeneous isotropic turbulence with application to non-motile phytoplankton', by M. Niazi Ardekani, G. Sardina, L. Brandt, L. Karp-Boss, R. N. Bearon & E. A. Variano. Photo credit: Ashley Young.

- 554 Transient torque in stirred tanks
K. Steiros
- 579 Surfing the edge: using feedback control to find nonlinear solutions
A. P. Willis, Y. Duguet, O. Omel'chenko & M. Wolfrum
- 592 Clean versus contaminated bubbles in a solid-body rotating flow
M. Rastello, J.-L. Marié & M. Lance
- 618 Isolating strain and curvature effects in premixed flame/vortex interactions
F. Thiesset, F. Halter, C. Bariki, C. Lapeyre, C. Chauveau, I. Gökalp, L. Selle & T. Poinot
- 655 Sedimentation of inertia-less prolate spheroids in homogeneous isotropic turbulence with application to non-motile phytoplankton
M. Niazi Ardekani, G. Sardina, L. Brandt, L. Karp-Boss, R. N. Bearon & E. A. Variano
- 675 A numerical investigation of the asymmetric wake mode of a squareback Ahmed body – effect of a base cavity
J.-M. Lucas, O. Cadot, V. Herbert, S. Parpais & J. Détery
- 698 Detailed finer features in spectra of interfacial waves for characterization of a bubble-laden drop
U. R. Sumanasekara & S. Bhattacharya
- 719 Population balance equation for turbulent polydispersed inertial droplets and particles
F. Salehi, M. J. Cleary & A. R. Masri
- 743 Tomographic PIV investigation on 3D wake structures for flow over a wall-mounted short cylinder
H.-Y. Zhu, C.-Y. Wang, H.-P. Wang & J.-J. Wang
- 779 Evaluation of turbulent mixing transition in a shock-driven variable-density flow
M. Mohaghar, J. Carter, B. Musci, D. Reilly, J. McFarland & D. Ranjan

JFM Rapids (online only)

- R1 Sloshing in a Hele-Shaw cell: experiments and theory
F. Viola, F. Gallaire & B. Dollet
- R2 How we compute N matters to estimates of mixing in stratified flows
R. S. Arthur, S. K. Venayagamoorthy, J. R. Koseff & O. B. Fringer
- R3 An unambiguous definition of the Froude number for lee waves in the deep ocean
F. T. Mayer & O. B. Fringer
